Editor's Note: A Major Milestone

(Improved from May 1 message of the same title – esp. Table in p. 2 etc.)

In December 1994, while sitting in front of the auditorium of the Conference Center of New Delhi during the 8th ISCO conference, the then WASWC President **Hans Hurni** (left) asked me if I would like to serve as a Vice President (VP) in his council. I said YES. At that time there were up to about 8 VPs, holding the title of 'regional vice president'.

From then until today, for more than 16 years, I have been serving in WASWC council all the time without a break, doing work in about half a dozen positions, e.g. *Vice President, Deputy President, President, Immediate Past President, Acting President, Immediate Past President* (again), *Past President* and, this time, *Advisor* in the 2011-13 council of President **Li Rui** (right).

For all these years, with many active colleagues in various councils, WASWC (or 'WASWAC' from January 2010) has grown up sizably and metamorphosed to become an organization that truly serves the world – thanks largely to the adoption of the internet system of communications from late 2001 until now – plus few other factors that had coerced the moving of the secretariat (aka headquarters) from a first world country (USA) to a developing country (China).

During the past decade WASWAC has produced several forms of media that are useful for members. From the year the association was established in 1983, a quarterly Newsletter was regularly sent out as hard copy up to 2001. Then the electronic version was produced and sent along with the hard copy to members who were hooked with the internet. From 2005 onward we finished the hardcopy and only the electronic one was sent out; it has become a regular practice up to now.

The quarterly WASWAC Newsletter was at all times dedicated to announcing meeting events and reporting their outcomes, and was a solitary publication of the association. From 2006 onward, I tried my hand in separating news about meetings, funding, scholarships, awards, training courses, exhibitions, study tours, publications, etc. into a separate cover, and called it HOT NEWS. At first it was done quarterly too, but because of the great abundance of such news, we decided to release it monthly from 2007 and there have been some extra issues during the times when many issues indicated very quick deadlines, especially concernign funding. Despite the name of 'HOT' being not so academic, it has survived for five years already and no other name has been proposed to replace it yet.

In the meantime, the original WASWAC Newsletter has been dedicated to reporting the outcome from various meeting events, which are considered not so hot though essential; thus the publication still retains its reputation as the flagship of the association. Since early 2010, the Newsletter has been renamed WASWAC Bulletin, being issued thrice a year and wholly dedicated to academic reporting. **Prof Surinder S. Kukal** (left) of Punjab Agricultural University in India has been the Editor-in-Chief of the Bulletin, with a number of Senior Associate Editors. Since the previous WASWC Journal and Proceedings were finished since 2009, we are thinking whether this WASWAC Bulletin should incorporate scientific papers too, or we should start a new publication in the form of journal; the

Samran at 70, May 1, 2011, 20:30 hrs.

newly established secretariat of WASWAC in Beijing with adequate funding shows a great potential for doing that. Whether it will be ‘this’ or ‘that’, we will decide very soon.

For HOT NEWS, we report all news items that are of immediate interest because of their nature in having short deadlines in communicating with the hosts. This is well received by all members and I believe they benefit a lot from going through this monthly online publication. In each issue there are many publications publicized, e.g. books, reports, newsletter, magazines, bulletins; many of them are free – you just e-mail the publishers. To have HOT NEWS sent to you directly each month with hundreds of such news, we are probably the only association that serves members this way! Particularly at this milestone period I am lucky to have **Dr Karika Kunta** (right) of the Land Development Department of Thailand serving as my Co-editor, and she will take over as its Editor soon.

Apart from these, we host the WASWAC websites in Tokyo (Japan), Guangzhou and Beijing (China) and two Webshots photo websites. Other activities include issuing annual Special Publications; granting Norman Hudson Award and other awards; coordinating LANDCON series of meetings, with use of Guidelines for Successful Meetings & provision of Cooperation Package; organize/help organize meetings of interesting subjects; forming forum for discussion, e.g. law & policy, climate change, monitoring and evaluation (M&E), no-till; establishing contacts among professionals in various countries through councilors, Vice Presidents, Special Representatives; promotion of visits among academics of some countries; and promoting/assisting in building soil museums in various countries. Many WASWAC members find them useful.

It might help readers to see things clearer if we compare what WASWAC has achieved in its latter half of its life (28 years since its inception in 1983) with the first half, in both tangible & intangible items.

Item	First half (1983-1996)	Second half (1997-2011)
Office of the Secretariat (aka Headquarters)	Stayed with SWCS in USA with the fee paid for the services offered.	Operated by the International Research and Training Center on Erosion and Sedimentation (IRTCES) in Beijing, China and funded by the Chinese government.
Council	- Every 3 years. - Composed of 5 persons.	- Every 3 years. - Composed of up to 30 persons in 2011.
Officers	- President - WASWC Vice President (1) - Regional Vice Presidents (7-8)	- President - Deputy Vice Presidents (4) - Vice Presidents (~100) - Special Representatives (7-10) - Editors (30); Translators (24)
Membership categories	Categories: - Individual members (only Annual)	Categories: - Individual (Annual & Life) - Institution (Organization) - Student members - Gift members - Guest members
Membership numbers	Numbers: Up to 700+ at its climax and down to 300+ in 2001-02	Numbers: Approximately 1,000, with some 4,000 non-paying 1-year Guest members.
WASWAC Newsletter, quarterly	In print only, to be sent by post.	- In print up to 2004, to be sent by post. - Digital copy, sent by e-mail from late 2001 onward. - From 2010, it became WASWAC Bulletin, 3/ year.
WASWAC HOT NEWS, monthly	-	Started from 2006, issued monthly, with Extra issue for certain months. Members have a good opportunity to frequently access data and information on meetings, training, study tours, courses, scholarships, jobs, expositions, books, proceedings, reports, newsletters, magazines, brochures, websites, and all kinds of communication.
WASWAC Journal/Proceedings	-	Online only. - 1 st period done during 2006-9; - 2 nd period will start in 2011 or later.
Books – Special Publications	Published a good number of technical books with SWCS and other publishers during 1988-1996.	Published a good number of technical books with a publisher during 1997-2007, then from 2003 shifted its publication to become Special Publication to distribute for free or at low prices, for a wider spread.

Meetings (conference, workshop, symposium, etc.)	Cooperate with ISCO and other organizers from early 1980s, considered a tradition.	Cooperated with ISCO and other organizers until 2008 and started to organize by itself from 2010 onward, by calling it “WASWAC World Conference and Council Meeting”, scheduled to take place every 3 years.
Website	-	Started in 2002 at AIT, Bangkok and stays still since mid-2007. Websites at present are operated from Guangzhou, Tokyo & Beijing.
Awards	- Honorary Membership Award	- Honorary Membership Award - Norman Hudson Award - Distinguished Researcher Award - Distinguished Extensionist Award - Special Award
Members’ Forum	Done through the printed Newsletter	Done digitally through the internet, with a number of remarkable achievements, e.g. - WASWC Vision & Mission, Slogan, - Guidelines for Successful Meetings
Possibility for Worldwide Contact through the Internet and Social Media Networks	-	Members can now freely contact people inside and outside the association by e-mail – with possibility to use social media networks of Facebook and YouTube.
Cooperating with related networks	-	WASWAC works with relevant networks, e.g. SWAT, Asian Network of Debris Flow, Soil-Root Interaction Network, Conservation Agriculture, and hosts the LANDCON series of meetings that use Guidelines for Successful Meetings.
Other Activities	-	- Promotion of members’ visits to counterparts in other countries; - Promotion of the construction of soil museums in various countries.

Certainly, such achievements have been obtained only because of the group efforts of all successive councils and councilors. As well, the foundation works as shown by former councils and councilors were quite indispensable, just like a Chinese proverb that says, “*Don’t forget the well-diggers when you drink water from the well*” (President’s Message of Prof Li Rui, HOT NEWS, February 14).

Having come to this point when we have a firm house in Beijing for our secretariat to stay (right, lower building), with **Prof Li Rui** as the president for this

term, with **Prof Miodrag Zlatic** (above) as the Immediate Past President to help and work along with, and with a strong council of 30 men of wisdom (*yes, all councilors are men, see left and more details in the next page*) living/working in various countries of the world, I am most pleased to assist, at least to the end of this term, as the *Advisor*. As mentioned, most duties that I had been responsible before have been transferred to the hands of several able people – I thus have no doubt about the success

of the association in this term and far beyond that.

Today I have become 70 (a *septuagenarian*, as it is called) and feel it is ripe in terms of a working person. I therefore would like to humbly announce my stepping down from most posts that I have been holding in WASWAC and wish the new administration well in advancing the course of action of our association to benefit worldwide people in sharing information, technology and wealth in order to help each other manage and care for the natural resources – importantly soil and water – in various parts of the world.

Before closing (as I know from now I will play a smaller and smaller role in WASWAC and you will hear less from me), I would like to thank all people who have played certain roles in making WASWAC delivered, survive and function well in this world, particularly within my time to those appearing in the blue chart (next page) who were instrumental in moving the WASWAC to a stable place.

Apart from that, I wish to thank profoundly the two persons as follows.

- **Bill Moldenhauer**. He had established the WASWC single-handedly in 1983 and served in various positions all the time until he passed away in May last year. He regularly observed the health of the association, which roughly corresponded with the number of members: it was >700 in the period 1987-1990 but came down to around 300+ in 2000. His voice was a strong force in enabling the move of the secretariat to a less expensive country – eventually to China.

- My dear wife *Leticia Pugay* who – though without any agreement at the start of my tenure – faithfully allows her husband to spend full time for running the WASWAC (on the voluntary basis – no compensation) while she takes care of all household works. As a citizen of the Philippines, the country where English is used widely, her presence helps me immensely in commanding this foreign language that Thai people are not so familiar with. The generous help that enables her husband to do this work comes from the pride that this combined effort may help sustain the world’s natural resources or at least delay their deterioration somewhat. We both feel that when there is a chance to do it, we should do!

Last, the real last, but a rather personal one, I would like to thank those who congratulated me for having become a septuagenarian. Yes, it is encouraging to have reached this age when some decades ago people in developing countries could rarely make it – thanks to the progress in science that led to a better medication that helps prolong life of most people on earth now.

Dear all friends, I will be sitting in the spectator’s chair much of the time from now and will enjoy viewing the progress of the WASWAC. I am sure it definitely will. I hope that, with the house firmly built, those who live in it will not have much to worry. Step from now would be to work on the issues that have come up during past few decades, e.g. Climate Change, Soil Quality, Conservation Agriculture, Landcare. I wish all of you good luck!

Absolute last: A friend sent a proverb to me today. It’s nice to read and ponder ...

Today is the oldest you've ever been, yet the youngest you'll ever be, so enjoy this day while it lasts.

Members of the WASWAC Council 2011-2013

Row 1: Liu Zhen, Honorary President, China; Li Rui, President, China; Miodrag Zlatic, Immediate Past President, Serbia; Samran Sombatpanit, Advisor, Thailand; C. Sukvibool, Deputy President, Thailand; James Owino, Deputy President, Kenya; Will Critchley, Deputy President, Netherlands; Roberto Peiretti, Deputy President, Argentina
Row 2: Ning Duihu, Secretary General, China; Liu Xiaoying, Treasurer, China; Machito Mihara, Japan; Li Dingqiang, China; Suraj Bhan, India; Surinder S. Kukal, India; Julian Dumanski, Canada; Doug Wimble, Australia
Row 3: Ian Hannam, Australia; Rachid Mrabet, Morocco; Tijani Moshood, Nigeria; Valentin Golosov, Russia; Mike Fullen, United Kingdom; Eric Roose, France; José Rubio, Spain; Winfried Blum, Austria
Row 4: Alfred Hartemink, Netherlands; Ted Napier, USA; Theo Dillaha, USA; Franco Obando, Colombia; Gustavo Merten, Brazil; Shabbir Shahid, United Arab Emirates

Initial agreement was made in August 2002 that China would host the secretariat of WASWAC. It, however, took some time to learn about the work and to find suitable agencies in China to handle it in various sections.

FINAL ANNOUNCEMENT

**14th PSSST Annual Meeting
 and Scientific Conference**

Theme:
*Improving Productivity of Marginal
 Lands Through Integrated Soil
 and Water Management*

Date: May 25-27, 2011

**Venue: Visayas State University (VSU)
 Baybay, Leyte**

Co- Sponsors

Australian Government
 Australian Centre for
 International Agricultural Research

RATIONALE OF THE MEETING AND SCIENTIFIC CONFERENCE

The 14th PSSST Annual Meeting and Scientific Conference is being organized to consolidate existing knowledge and strategies on integrated soil and water management to improve productivity of marginal lands. This will give the participants from the academe, government, and private sectors an opportunity to interact and share research outputs and experiences. This will also enable them to upgrade their technical expertise, renew personal acquaintances, and meet new friends of the same scientific interests.

CALL FOR ORAL AND POSTER PAPERS

- Submit an extended abstract for inclusion in the Conference's Proceedings.
- Extended abstract should be limited to 2 pages (A4 size paper and Arial font size 11) single spaced and should include brief Introduction, Methodology, Results and Discussion, Conclusion, References, and Figures or Tables.
- The title of the paper should be capitalized. Write the full name of the authors and put asterisks after the name of the author who will present the paper.
- For Best Paper competition, submit full paper with maximum of 20 pages, including figures and tables (Arial font size 12, double spaced) in MS word format.
- Poster paper should be printed in 76.2 cm x 101.6 cm (30 in x 40 in) tarpaulin/illustration board, in portrait orientation. The general text should be readable at two-meter distance while figures (drawings, pictures, graphs, or charts) with proper label and caption should be legible at one-meter distance.
- For undergraduate students and PSSST thesis grantees who will present BS thesis, please submit your manuscript in scientific format.
- Send the extended abstract or full paper to the Secretariat preferably thru e-mail at pssst_pro06@yahoo.com

Important dates to remember:

March 15, 2011—extended deadline for submission of extended abstracts for oral and poster presentation

March 31, 2011– deadline for submission of full paper for oral presentation and confirmation of attendance to the 14 Annual Meeting and Scientific Conference

Extended abstracts submitted after the deadline will NOT be included in the proceedings.

60th Anniversary
Battle of Leyte Gulf
 Liberation of the Philippines

October 20, 1944

'I Have Returned' Gen. Douglas MacArthur

Leyte is the island where Gen. Douglas MacArthur and his troops landed in 1944 saying, "I have returned". When he and his troops departed the Philippines earlier, he pledged "I shall return," which has been frequently quoted and become immortalized. Below is the monument of the RETURN.

Map of the Philippine Islands

ABOUT THE VENUE

The Visayas State University or VSU is a premier agricultural university and research center in the Philippines and one of the country's largest university with five campuses located in the different parts of Leyte, ten colleges, three institutes and one school. It was formerly known as Visayas State College of Agriculture (ViSCA) then be-

came *Leyte State University*. On April 27, 2007 it is named VSU by virtue of RA No. 9437.

The VSU is identified as a multi-commodity research center by the Bureau of Agricultural Research in the Philippines. It is identified by the Commission on Higher Education (CHED) as Center of Excellence in Agriculture, Agricultural Engineering, and Forestry and Zonal Research Center in Region 8.

The main campus of VSU is located in Barangay Pangasugan, Baybay, Leyte. It covers 1,099.4 ha land area that extends from the shores of Camotes Sea to the top of Mt. Pangasugan. Mt. Pangasugan covers one of the last remaining virgin forests in the Philippines. It serves as a habitat of many animal species listed in the Red List of Threatened

World Conservation Union, including the Philippine tarsier.

VSU also stands for Very Scenic University. It is now one of the most visited tourist attractions in the province of Leyte. The shore of the Camotes Sea offers breath taking sunsets and beautiful beaches. VSU has more to offer for the students, faculty, and visitors. It has developed relaxation facilities which include swimming pool, view-

At the southern end of Leyte Island (Southern Leyte Province) you may like to visit the site of a huge landslide that occurred 5 years (February 17, 2006) ago at Saint Bernard, Guinsaugon village, killing over 1,000 villagers.

OTHER EVENTS

△ International Conference on Dryland ecosystem functioning and resilience: integrating biophysical assessment with socio-economic issues

Alghero (Italy) 6-8 July 2011

03 maggio 2011

CONFERENCE THEME AND AIM

The Conference on *Dryland ecosystem functioning and resilience: integrating biophysical assessment with socio-economic issues* intends to relate a better understanding of the landscape-scale dynamics that lead to improvements in nutrient and water cycling, to their impacts on the climate sensitivity of desertification.

This new knowledge is set against the context of the complexity of increasing the resilience of dryland ecosystems particularly in relation to looming problems of food security and the expected costs and benefits to society of land degradation and sustainable land management respectively.

The conference intends to play an important role as a platform to elaborate scientific issues and make proposals to be presented at the forthcoming COP10 of the UNCCD Convention on combating desertification.

This conference is jointly organized by European Science Foundation, DesertNet International and NRD Desertification Research Group (University of Sassari), and will be held in Alghero (Italy) from 6 to 8 July 2011.

Below please find information on the Conference Programme and Rationale, the Registration form and fees and poster submission.

Information on logistics and accommodation in Alghero will be available soon.

POSTER PRESENTATION

Poster guidelines and registration form are available below.

CONFERENCE VENUE

The conference will be held at the Conference Hall of the [Chiostrò San Francesco](#), via Carlo Alberto n° 46, Alghero (Italy).

Δ NATURAL ZEOLITE AS ORGANIC FERTILISER, SOIL & WATER TREATMENT

Friday, May 6, 2011 8:04 AM

From: "Firuze Batu" <f.batu@rotamadencilik.com> [Add sender to Contacts](#)

To: sombatpanit@yahoo.com

Dear **Sir/Madam**,

Rota Mining is the world's leading producer of industrial zeolite mineral. As a world leader in our field, we are committed to setting the standards for the zeolite industry.

Rota Mining produces a wide range of zeolite products at the mining and processing plant in Manisa / Turkey.

With the widest zeolite product range and unsurpassed applications expertise, we are the only zeolite producer that can meet all end-use requirements worldwide. We have customers from over 42 countries all over the world.

The development of partnerships with customers is essential within the value-added markets of zeolite mineral. Rota Mining provides customers with tailor-made solutions based on an in-depth understanding of the manufacturing process, production and business constraints of every market segment it serves.

We understand quality as being an essential need for our customers. In order to guarantee the performance of our products, all extraction and production processes are carried out under a strict quality control system, maintaining the highest respect for the environment.

Rota Mining is your reliable supplier who guarantees a service totally adapted to your needs, with the best quality/price relationship.

Best regards,

Firuze Ayvazoglu Batu (Mrs.)

for sustainable production intensification

Dear Colleagues,

Herebelow, two FAO vacancy announcements (in English, French and Spanish), for your kind attention. One vacancy is for a Land and Water Development Engineer (P4 level) to be based at the HQ in Rome. The other is for a Technical Officer (Water Resources Development and Conservation) (P3 level) to be based at the Regional Office for Asia and the Pacific (RAP) in Bangkok.
